## PARTNERSHIP CORNER

### Flu Vaccines

Flu Activity Increasing Sharply in the U.S.

**According to the Centers for Disease Control and Prevention (CDC) Influenza (flu) is a contagious respiratory illness caused by influenza viruses. It can cause mild to severe illness. Serious outcomes of flu infection can result in hospitalization or death. Some people, such as older people, young children, and people with certain health conditions, are at high risk of serious flu complications.**

**The best way to prevent the flu is by getting vaccinated each year. It's not too late to get your flu shot.**

**Influenza vaccines are available at Access Omnicare for your employees. Should you be interested in using our clinic for your annual flu shots, please reach out to Yvette Bonnet, [yvette@accessomnicare.com](mailto:yvette@accessomnicare.com) so that we can manage our supply.**

### MPN: Are We In Your Insurance Network?

The world of Workers' Compensation insurance carriers and Medical Provider Networks (MPN's) is complex and difficult to understand for some employers. How do you know whether a specific doctor or facility is included in your network?

We have requested that all insurance carriers list Access OmniCare and categorize us under 'occupational clinic', rather than the

physician name but it is a tedious process.

Therefore, often we are not listed as Access Omnicare or under clinics; we are often under one of our doctor's names.

[Let us confirm our participation for you](#)

When you contact us we will provide you with documentation from the carrier that confirms that we are "in network" and that you can confidently use Access OmniCare to treat your injured workers.
